

Considering replacing your old windows?

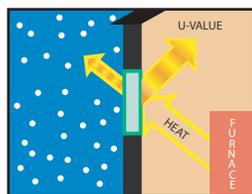

THEN CONSIDER CASCADE AND RECEIVE QUALITY, VALUE & STYLE.

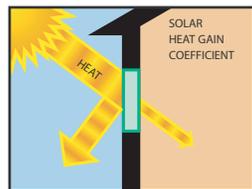

With today's rising energy costs, energy efficient windows are a key component in saving you money while keeping your home bright and comfortable year round. Cascade windows not only give you energy efficiency, they bring quality, value and style.

LOW-E GLASS

High performance glass coatings reflect outside heat in the summer and interior heat in the winter reducing your air conditioning and heating costs. Additionally, Solarban[®] coated glass blocks many of the sun's damaging UV rays.

Lower u-values keep your home warmer in Winter.

Lower SHGC numbers mean less Summer heat is transferred into your home.

CONSTRUCTION Take a look inside the construction of a Cascade window and you will see extensive thought given to every detail. Each window is built with a solid efficiency rating and is offered in many styles. Another reason Cascade windows are the best value in any class.

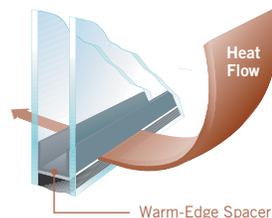

All Cascade frames are built to last with reinforced meeting rails.

WARM-EDGE SPACER

Cascade utilizes the best glass spacing technology available today. Their warm-edge spacer system conducts less heat through the window. This technology can significantly improve a home's overall energy efficiency.

Complete your remodeling project with an energy efficient Cascade patio door. Choose from standard (left) or wide-rail (below) models.

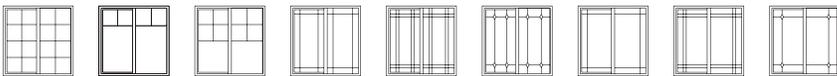

Super Spacers
